DETAILED ACTION

Claims 1-2, 5, 7-10, and 12-55 have been cancelled. Claims 56-58 have been newly added. Claims 3-4, 6, 11, and 56-58 are under consideration.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 3-4, 6, and 56-58, drawn to nucleic acids encoding ADNF III polypeptides, classified in class 536, subclass 23.5.
- II. Claim 11, drawn to an ADNF III promoter, classified in class 536, subclass 24.1.

The inventions are distinct, each from the other because:

Groups I-II are related as both being nucleic acid products; however, each of these products is structurally distinct and has a different and distinct function. They are patentably distinct products.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the necessity for non-coextensive literature searches, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1647

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
